Supplemental Figure 1. Box-and-whisker plot of percent change in MRI-assessed tumor volume over time of the largest tumor (intent-to-treat population)

Supplemental Figure 2. Box-and-whisker plot of percent change in T2 hyperintensity signal ratio over time of the largest tumor (intent-to-treat population)

Where available, data are shown as the minimum (lower whisker), 25% percentile (lower bound of the box), 50% percentile (middle line in the box), 75% percentile (upper bound of the box), and maximum (upper whisker) values.
